

# Patient Journey for FLUMIST® (Influenza Vaccine Live, Intranasal) Ordering, Shipping & At-Home Administration

## 1 Finding Out & Learning More About FLUMIST

### FLUMIST AstraZeneca website

*Includes educational resources & support<sup>1</sup>*

[Flumist.com](https://www.flumist.com)

### ASPN website

*Third-party website that supports FLUMIST home service<sup>2</sup>*

## 2 Ordering Through Online Pharmacy

Adult completes a digital form to **determine eligibility<sup>2</sup>**

The screenshot shows a four-step process: Patient Info, Medical Questionnaire, Pharmacy Insurance, and Shipping & Payment. The 'Medical Questionnaire' step is highlighted. Below it, a sample question is shown: '1. Does anyone have any government insurance? Government insurance is any state or federally funded insurance...[Show more](#) ▼'.

## 3 Confirming Eligibility

**Online HCP** reviews the form, **confirms eligibility** and generates and fills prescription<sup>2</sup>

**Commercial insurance for the 2025/26 season**  
*Only private health insurance*

**Age<sup>3</sup>**  
*2–49 years*

**Medical eligibility<sup>2</sup>**  
*ACIP Recommendations*

**Pharmacist is available** via chat or a **toll-free number** for questions,<sup>2</sup> as per [Immunize.org](https://www.immunize.org) **FLUMIST screening tool<sup>3</sup>**

## 4 Shipping & Delivery

Shipped under **conditions** to maintain appropriate temperature<sup>2</sup>

Patients will receive **tracking updates** and/or **delivery notifications** via text/email<sup>2</sup>

**FLUMIST is delivered on the date selected by the patient<sup>2</sup>**

## 5 Handling & Administration

Instructions for home **storage & administration<sup>2</sup>**

**FLUMIST vaccine information statement<sup>2</sup>**

**QR code** for “How to administer FLUMIST” video

**Online and toll-free number** for pharmacist support

## INDICATION

FLUMIST is a vaccine indicated for active immunization of persons 2 through 49 years of age for the prevention of influenza disease caused by influenza virus subtypes A and type B contained in the vaccine. FLUMIST is for intranasal administration only.

## IMPORTANT SAFETY INFORMATION

- Do not administer FLUMIST to persons who have had a severe allergic reaction (e.g., anaphylaxis) to any component of the vaccine, including egg protein, or after a previous dose of any influenza vaccine, or to children and adolescents through 17 years of age who are receiving aspirin or aspirin-containing therapy
- When administered in a healthcare setting, appropriate medical treatment must be immediately available to manage potential anaphylactic reactions. When self-administered or administered by a caregiver, immediate medical attention should be sought if the vaccine recipient experiences symptoms of an allergic reaction

Please see additional Important Safety Information on next page and full [Prescribing Information](#), including [Patient Information](#) and [Instructions for Use](#).

## Ordering, Shipping & At-Home Administration

### 6 Disposal of FLUMIST Sprayer & Packaging

After administration, the **single-use FLUMIST** sprayer(s) should be sent back using the **prepaid return envelope** included in the packaging<sup>2</sup>

### Reporting Vaccination Status Through Immunization Information Systems (IIS)

Adult confirms administration of the vaccine. Pharmacy then reports vaccination to IIS.<sup>2,4,5</sup>

Adult

ASPN website

Reporting service

Registries

CDC Dashboard

Documentation is available to patients and their health care providers<sup>2,a</sup>

### IMPORTANT SAFETY INFORMATION (continued)

- In clinical trials, the risks of hospitalization and wheezing were increased in children younger than 2 years of age who received FLUMIST
- Children younger than 5 years of age with recurrent wheezing and persons of any age with asthma may be at increased risk of wheezing following the administration of FLUMIST. FLUMIST has not been studied in persons with severe asthma or active wheezing
- If Guillain-Barré syndrome has occurred within 6 weeks of any prior influenza vaccination, the decision to give FLUMIST should be based on careful consideration of potential benefits and risks
- The effectiveness of FLUMIST has not been studied in immunocompromised persons
- The safety of FLUMIST in individuals with underlying medical conditions that may predispose them to complications following wild-type influenza infection has not been established
- FLUMIST may not protect all individuals receiving the vaccine
- The most common solicited adverse reactions (≥10% in vaccine recipients and at least 5% greater than in placebo) reported after FLUMIST were runny nose or nasal congestion (ages 2-49 years), fever >100 °F (children ages 2-6 years), and sore throat (adult ages 18-49 years)

### INDICATION

FLUMIST is a vaccine indicated for active immunization of persons 2 through 49 years of age for the prevention of influenza disease caused by influenza virus subtypes A and type B contained in the vaccine. FLUMIST is for intranasal administration only.
