

APCM Implementation Tool

The Advanced Primary Care Management (APCM) model, finalized in the 2025 Medicare Physician Fee Schedule, is a new Medicare service designed to support primary care practices in delivering enhanced, continuous care to patients through a value-based approach, with reimbursement based on patient complexity and risk stratification.

APCM services combine elements of several existing care management and communication technology-based services you may have already been billing for your patients. This payment bundle reflects the essential elements of advanced primary care, including:

- [Principal care management](#) (PCM)
- [Transitional care management](#) (TCM)
- [Chronic care management](#) (CCM)

NC AHEC has designed a new APCM Implementation Tool to help your practice evaluate, plan and implement a financially sustainable APCM program. NC AHEC Practice Support Coaches are also available to assist you with this proforma at no cost.

Click [here](#) to access the APCM Implementation Tool. If you do not already have a Practice Support Coach, please contact us at practicesupport@ncahec.net.
